Education

- | | |
|--|------------------------------------|
| B. University of Perugia , Computer Science
• Graduated with 108/110. | Perugia, IT
Oct 2019 – Apr 2023 |
| M. University of Pisa , Computer Science (Software: Programming, Principles, and Technologies)
• Graduated with 110/110 with honors. | Pisa, IT
Oct 2023 – Oct 2025 |

Experience

- | | |
|---|---|
| Ds Digital Services , Developer
• Built dynamic websites and e-commerce platforms using WordPress as a CMS.
• Created and customized PHP plugins. | Assisi, PG, IT
Dec 2021 – Dec 2024 |
| Cheapfit , Developer
• Built the website and e-commerce.
• Automated data analysis from the MySQL mobile application database.
• Implemented real-time user ranking with custom REST APIs in PHP.
• Developed frontend pages for live rankings using HTML, CSS, and JavaScript.
• Built an AI tool using OpenAI APIs with a PHP backend and React frontend. | Assisi, PG, IT
June 2022 – Sept 2024 |
| Advancia Technology , Full stack developer
• Backend development using Java, Spring boot, Spring Batch, OracleDB, MySQL, Hibernate.
• Frontend development, using Angular, Rxjs .
• General DevOps tools, Jenkins, Docker. | Viareggio, LU, IT
Nov 2025 – present |

Projects

- | | |
|--|---------------------|
| Bachelor Thesis Project 🔗
Implementation of charts for students results analysis.
• Built a dynamic page for professors to analyze exam results using charts.
• Frontend implemented with Chart.js.
• Developed with MVC architecture using PHP and MySQL. | Jan 2023 – Apr 2024 |
| Master Thesis Project 🔗
Fast Access through Lightweight Block-Based Compression Algorithms.
• Built a hybrid columnar-row store index in Rust.
• Implemented blocked bit-packing and lightweight compression to improve access time. | Mar 2025 – Oct 2025 |
| Compiler and Interpreter 🔗
Developed interpreters for MiniImp and MiniTyFun, and a compiler from MiniImp to MiniRisc with optimizations using OCaml.
• Implemented MiniImp, a subset of an imperative language.
• Developed MiniTyFun, a functional language with type checking.
• Built a compiler from MiniImp to MiniRisc (ILOc-style intermediate code) with optimizations. | Spring 2025 |
| Discord music and soundboard bot 🔗
Discord bot to play audio from YouTube and Spotify links. | Oct 2024 – present |

- Fully written in Rust, open source, and self-hostable.
- Plays soundboard with unlimited custom audio files.
- Actively used in multiple servers.

Skills

Programming: Proficient with Rust, Python, and Git; good understanding of Web, Linux, and Operating Systems concepts

Other Programming Languages: Java, C, JavaScript, OCaml, PHP, SQL, Go

Languages: English (fluent), Italian (native)
